

## Educate to transform

### Profertil's scholarship program already has its 2021 selection

**Ingeniero White, May 19, 2021.**- Educar para Transformar - Profertil's scholarship program - recently completed the selection of the twelve students from Escuela de Educación Secundaria Técnica N° 1 "Crucero A.R.A General Belgrano", who will participate in the 2021 cycle. In addition, three graduates of 2020 continue to receive scholarships for their university studies, since they have chosen to study the Industrial Operations Technician Degree. They are added to the 10 scholarship holders of that career.

Educate to Transform is a program that seeks to stimulate the completion of high school studies and to accompany talents in technical university education. It consists of two stages: first, there are scholarships for students who are in their last year of studies at the Technical Education School No. 1 of Ingeniero White. On the other hand, students of the University Industrial Operations Technician Degree of the Universidad Nacional del Sur, a course sponsored by Profertil, are also supported.

Gustavo Lucero, Human Resources Manager of Profertil, commented that "it is very important for us to give continuity and make this program grow, which during 2020, despite the challenges of the pandemic, achieved very good results". In this edition, the company provided scholarships to 22 students (twelve from the technical school and ten from the university). The support is financial, and they also receive training and advice on diverse topics related to the industry and the world of work.

**Educate to Transform** is in line with the objectives of the "2030 Agenda for Sustainable Development", proposed by the United Nations document to which Profertil is a signatory. Specifically, with this action, the company seeks to contribute to the objectives Quality Education and Gender Equality, and Partnerships to Achieve the Millennium Development Goals.
