

## COMMUNITY INFORMATION

PROFERTIL informs its neighbors

**Ingeniero White, January 10.** The Company informs that in the early hours of this morning, it started the operations to take out of service the urea production plant of the complex, to carry out maintenance tasks, estimating to initiate the start-up process again in the next 24 hours.

As usual in this type of tasks, during the shutdown process there will be greater luminosity in the flares and, possibly and occasionally, an increase in the usual sound level.

The municipal, provincial and national authorities are duly informed as is often the case in these operations.

For any concerns that may arise, please contact us through the usual channels and our social networks (@profertilAgro).
