

## COMMUNITY INFORMATION

PROFERTIL informs its neighbors

**Ingeniero White, March 7.** The Company informs that, in the early afternoon today, it started the operations to take out of service the urea production plant of the complex, to carry out maintenance tasks, estimating to initiate again the start-up process in the next 24 hours.

During the shutdown process there will be greater luminosity in the flares and, possibly and occasionally, an increase in the usual sound level.

The municipal, provincial and national authorities are duly informed as is often the case in these operations.

For any concerns that may arise, please contact us through the usual channels and our social networks (@profertilAgro).
