

INFORMATION FOR THE COMMUNITY

PROFERTIL informs its neighbors

Ingeniero White, May 17 The company informs the community that, due to an electrical problem, it has started the shutdown process of its urea plant. The plant is expected to start up in the next 24 hours.

During the course of these processes there will be a greater luminosity in the flares and an increase in the usual sound level. The municipal, provincial and national authorities have already been informed of these maneuvers.

The contact channels for any concerns that may arise are the usual ones and the company's social networks (@profertilAgro).
