

INFORMATION FOR THE COMMUNITY

PROFERTIL informs its neighbors

Ingeniero White, May 03 The company informs that, once the maintenance tasks are completed, the start-up maneuvers of the production units of the complex will begin tonight. The start-up process will take approximately 6 days.

During this time there will be a greater luminosity in the torches and, eventually and sporadically, an increase in the usual sound level.

The municipal, provincial and national authorities are duly informed as usual in these maneuvers.

The contact channels for any concerns that may arise are the usual ones and our social media (@profertilAgro).
