

COMMUNITY INFORMATION

PROFERTIL informs its neighbors

Ingeniero White, April 23. The Company informs that this afternoon it started the operations to take out of service the production plants of the complex, to carry out maintenance tasks. It is expected to initiate the start-up process within the next 15 days.

During the shutdown process there will be greater luminosity in the flares and, possibly and occasionally, an increase in the usual sound level.

The municipal, provincial and national authorities are duly informed as is often the case in these operations.

For any concerns that may arise, please contact us through the usual channels and our social networks (@profertilAgro).
