

## Profertil participates in the Fertility Symposium 2023

Profertil joins the 16th edition of the Fertility Symposium 2023 " Al gran suelo argentino, ¡salud! (To the great Argentine soil, health!), with a stand that will have different representatives of the company.

After 4 years of absence in face-to-face format, this important event will take place on May 10 and 11, at the Metropolitan Convention Center, Alto Rosario Shopping in the city of Rosario, Santa Fe.

The "Fertility 2023 Symposium" aims to discuss relevant knowledge and information on nutrient management that will allow the producer to produce in a sustainable way. It will also discuss the most relevant aspects related to the management and care of our soils and the use of the four key requirements (4R) for nutrient management (dose-source-time-form).

In this sense, the fertilizer company disembarks at the Symposium with a stand that highlights the importance of crop nutrition from a perspective based on sustainability.

On the other hand, Agr. Eng. Mirta Toribio, head of R & D of Profertil will be moderating the panel "**To be better farmers we must have better livestock systems**", with the participation of Alejandra Marino from the FCA-UNMDP and Elena Patron, referent of the Water and Milk Group of Uruguay.

Profertil, as part of the FERTILIZAR Association, considers of utmost importance to support this event, since soil care is a task that requires awareness and training of all the actors involved in agricultural production.

The company is committed to collaborate in the transfer of knowledge aimed at the care of soil health, the use of best management practices for the maintenance and sustainability of production systems.

## **About Profertil**

*It is a company devoted to the production of the fertilizers needed to optimize crop yields in a sustainable manner. Integrated in equal parts by YPF and Nutrien Inc, it has been operating its production plant in the port of Ingeniero White for 22 years. There, it produces 1,320,000 tons of granulated urea annually, the main nitrogen fertilizer for the soil. In addition, it sells other fertilizers and prepares tailor-made mixtures to provide each territory and crop with the nutrition required. It has administrative offices in Buenos Aires and logistic terminals in Bahía Blanca, Necochea, San Nicolás and Puerto General San Martín (Santa Fe). It has 365 direct employees, 1,500 indirect employees and more than 850 active suppliers.*
